
Aggregation Operators New Trends And Applications

averaging aggregation operators with interval pythagorean ... - intuitionistic fuzzy weighted geometric (ivifwg) operators. wei and merigo [18, 26] worked in the field of aggregation operators and introduced the notion of the two new types aggregation operators such as, the induced intuitionistic fuzzy ordered weighted geometric (iifowg) operator as well as the induced interval-valued **some geometric aggregation operators based on ...** - common aggregation operators in the field of information fusion. but these two aggregation operators are usually used in situations where the given arguments are expressed as crisp numbers or linguistic values. in this paper, we develop some new geometric aggregation operators, such as the intuitionistic fuzzy **aggregation operator for assignment of resources in ...** - there is a need for specially designed aggregation operators. in this paper, a new aggregation operator will be presented specifically for the aforementioned problem. this falls under the category of owa (ordered weighted averaging) operators, and more specifically neat owa. the use of aggregation operators in group decision models **new aggregation operator for trapezoidal fuzzy numbers ...** - shrivastava, "new aggregation operator for triangular fuzzy numbers based on the geometric means of the l- and r- apex angles", submitted for publication (2012) [3] manju pandey, nilay khare, and s.c. shrivastava, "new aggregation operator for trapezoidal fuzzy numbers based on the **distribution-based aggregation for relational learning ...** - distribution-based aggregation for relational learning ... this paper's main contribution is the introduction of aggregation operators that ... for designing aggregation operators, introduce the new aggregators in the context of the relational learning system aora (automated construction of relational attributes), and ... **prioritized averaging/geometric aggregation operators ...** - under environment of the intuitionistic fuzzy soft sets (ifsss), and some new averaging/geometric prioritized aggregation operators have been proposed whose preferences, related to attributes, are made in the form of ifsss. their desirable properties have also been investigated. furthermore, based on these operators, an approach to ... **a new minkowski distance based on induced aggregation ...** - a new minkowski distance based on induced aggregation operators josé m. merigó, montserrat casanovas department of business administration, university of barcelona,
